

Skals Machinery delivers a high-capacity 50 T/H processing line to Yaham in Israel

A complete solution for efficient grading and product handling

Skals Machinery has recently delivered and installed a comprehensive processing line for the customer Yaham in Israel.

The installation brings together several stages of the processing operation, including conveyors, screen graders, web chains, stone and clod separators, and a KSV650 Double Box / Big-Bag Filler.

Designed around the customer's requirements for high capacity, operational reliability and gentle product handling, the complete solution provides an efficient and reliable flow throughout the processing line.

Efficient Product Handling with Skals Conveyors

Conveyors play a key role in maintaining a smooth and continuous product flow throughout the processing line.

The Skals conveyors connect the different stages of the processing line, ensuring reliable material handling and seamless integration between machines. Designed for high-capacity operation, they support a consistent flow of potatoes throughout the facility.

Accurate Grading with Skals Screen Graders

Consistent grading is essential for achieving the desired product quality.

The Skals screen graders provide accurate and efficient grading while ensuring gentle product handling. Their high capacity and reliable performance make them an important part of the complete processing solution.

Flexible filling with the KSV650 Double Box / Big-Bag Filler

The Skals KSV650 Double Box / Big-Bag Filler is designed for efficient and flexible filling of both boxes and big bags.

Featuring two filling stations, the system supports high-capacity operation and streamlines the packing process. Integrated into the processing line, it provides a flexible solution for the final stage of product handling.

Close Cooperation

Working closely with Yaham and our Israeli dealer, Yaadim Marketing L.T.D., Skals Machinery delivered and installed a complete processing solution tailored to the customer's requirements for capacity, operational reliability and gentle product handling.

We are proud to have completed this project in close collaboration with Yaham and Yaadim Marketing L.T.D. and wish Yaham every success with their new processing line.
